

## Mounting Instructions

### Touch Dimmer for "Clarus" Picture Light LED

**CAUTION!:** The electrical lamps have to be mounted without current and by cold state only by a specialist. Also the change of the bulbs has to be made in this state.

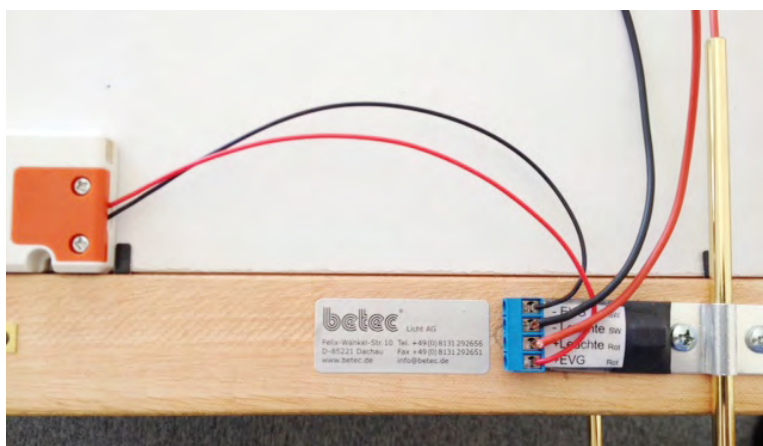

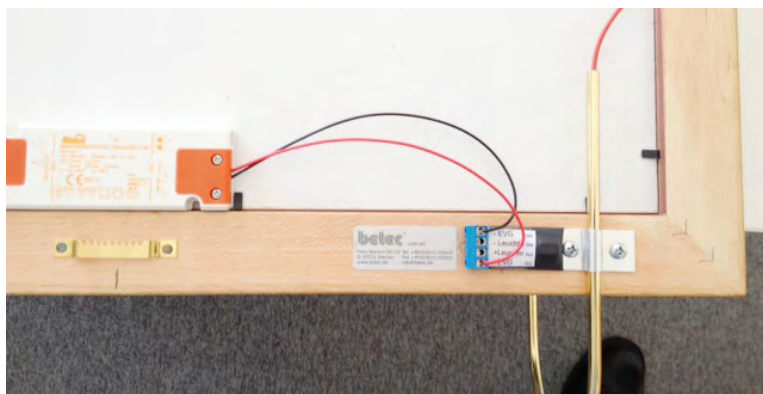

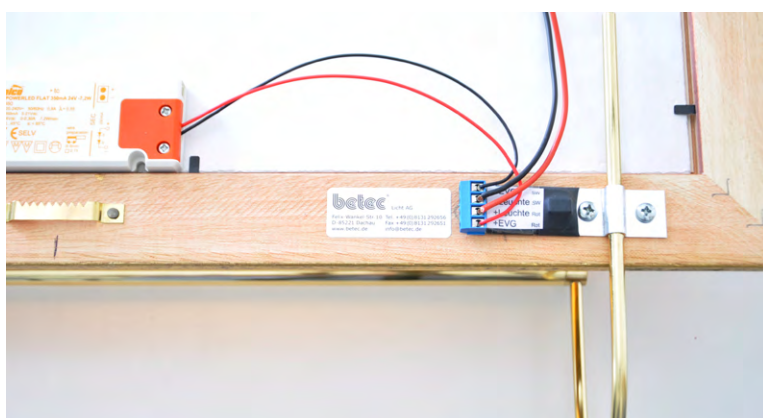

Ideal for switching the picture light on and off by touching the lamp. A brief 'Touch' = on/off. A longer 'touch' = 0-100% dimming.

Replace a fastening clip with the Touch dimmer clip, and connect the cables, ballast with ballast. Ensure the polarity is correct.

Red Point (+ Pol)

Then attach the cables from the light brackets to the terminal 'light', with correct polarity. And finally connect the power cord to "ballast L + N".
