

# 06 Discus

High-quality crystal mirror with indirect circular illumination with 56 LED modules connected in series. This design has an extravagant feel. The LED ring light will envelop your face in a flattering but honest manner. A prominent shape highlights your prominent features. It is only natural then that this mirror does not tolerate anything in its reflection apart from what it is supposed to show. The light illuminates the person facing it either as a standing version or as a wall mirror. The lamp can be regulated steplessly with a dimmer switch and ballast unit. Application: as a make-up mirror in bathrooms, theatres or hotels.

Material: brass, illuminant: LED, lifespan: 50,000 hours, LED-CEE: F, primary voltage: 220 - 240V, mirror circumference: Ø 520 mm, height of the stand: 340 mm, total height: 860 mm

Scope of delivery: whole mirror with illuminant, touch dimmer and ballast unit.
