

06 Make up 8

Extremely minimalistic and yet supremely functional. Assembled as one line of light, this lamp brightens entire rooms. Because the light shines both directly and indirectly into the room, there is no need for additional room lighting. The LED version can be rotated so that the brightness level between direct and indirect lighting can be changed. Application: bathrooms, dressing rooms in private areas, as well as in hotels.

Material: brass, illuminant: triple LED, lifespan: 50,000 hours, LED-CEE: F, primary voltage: 220V - 240V, secondary voltage: DC 24V, fluorescent tube: Ø 18 mm, glass tube: matted glass

Scope of delivery: whole lamp with LED illuminant and dimmable ballast unit.
