

22 Disque

The first LED swimming pool spotlight that is also suitable for retrofitting. The name Disque is based on the design of this swimming pool spotlight with an extremely flat back that does not require indented pool walls. This means that the spotlight can be easily installed or retrofitted in a tiled pool or a pool with tried and tested pool liners.

Due to the newly integrated PCS module, there is no temperature control within the spotlight, which allowed for the flat design. The entire spotlight is made of high-quality V4A stainless steel, polished and cast on the inside without bubbles. The front glass is made of VSG safety glass. 16 mm installation height. The LED light is steplessly dimmable (PWM ballast on request).

Material: V4A stainless, polished, anti-algic, diameter: Ø 185 mm, depth: 16 mm, illuminant: LED, operating voltage: 24V, EEC F, light colour: 3000 Kelvin, RA: 92+, total: 2500 mA, light field: 700 x 850 mm, beam angle: 130°, range: 8 m at 50%

Scope of delivery: a spotlight with encapsulated LEDs, fastening set and 110-230V/30W plug-in power supply. With 5 metres of cable.
