

33 Piano

LED music stand lamp made of brass with black, flocked switchboard. Every pianist or organist needs good lighting to be able to read their music. This lamp solves the problem of attachment to valuable instruments. It is adjustable in height and attached to a velvet-covered board, which then becomes a music stand. The only wiring is a socket on the bass end of the keyboard. Simply unplug the transformer cable, and the board can be readily removed, together with the lamp, and the piano closed. The fluorescent tube can be rotated and the pianist can adjust the lighting him or herself. Application: music stand lighting, menu lighting.

Material: brass, illuminant: LED, LED-CEE: F, Ra: 90, ballast unit: 220-240V, secondary voltage: DC 24V/12W, panel dimensions: 380 x 250 x 12 mm, total weight: 900 g, rotatable fluorescent tube: Ø 14 mm, bracket tube: Ø 6 mm, bracket width: 190 mm

Scope of delivery: whole lamp with LED illuminant, touch dimmer, plug-in power supply (4-metre long cable) and optional black panel.
